An Equal Opportunity Employer

Indiana's non-seasonally adjusted unemployment rate for March is 5.3 percent, eight-tenths of a percentage point below the national rate of 6.1 percent, Craig E. Hartzer, Commissioner for the Indiana Department of Workforce Development, announced today. The number of Hoosiers employed during March 2002 was 2,939,200.

Indiana's March unemployment rate was lower than Illinois, 6.4 percent; Kentucky, 5.6 percent; Michigan, 6.5 percent; and Ohio at 5.9 percent.

"March brought modest job growth in all sectors of our state's economy. We are still, however, focusing our efforts on servicing those Hoosiers still suffering the effects of the recession, especially those 25,000 Hoosiers on extended benefits," commented Hartzer.

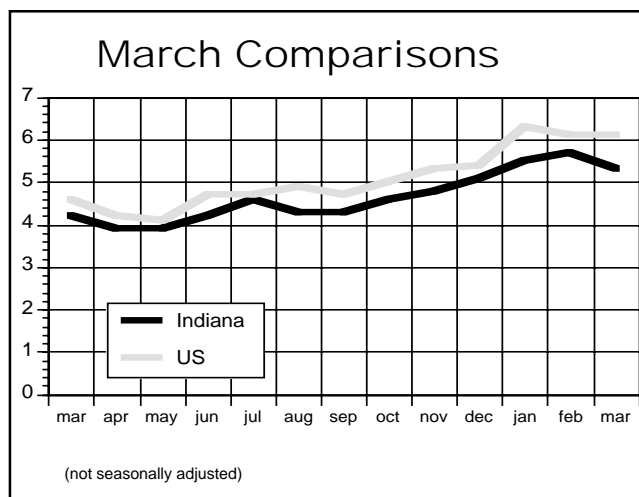

The monthly survey of 7,500 Hoosier employers reports payroll employment at 2,890,900, a decrease of 42,900 from one year ago and 15,600 more than last month. Payroll employment is an estimate of non-agricultural jobs in Indiana businesses. It differs from labor force employment which is used in the calculation of the unemployment rate by not including the self-employed and agricultural workers. In addition, payroll employment includes all those who work in Indiana, while the unemployment rate is calculated by those who live in Indiana.

Manufacturing employment totals 615,900 in March, a decrease of 35,900 from last year. Motor vehicle manufacturing accounts for 90,100 jobs, 3,100 less than one year ago. Manufacturing of motor vehicle parts totals 59,300. Industrial machinery manufacturing in March accounts for 64,000 Hoosier jobs, 500 less than February.

Construction employment totals 131,800 an increase of 2,400 from last month. Of that, heavy construction reports 13,800 jobs, an increase of 100 from last year.

Service producing employment totals 2,136,500 in March, 2,600 less than last year. Transportation and public utilities total 141,900, 100 more than February.

Retail trade totals 543,400, 2,300 less than a year ago. Of that, general merchandise

(over)

stores report employment of 78,400, or 2,600 less than last year. Service sector employment, such as business services, computer and data processing, totals 746,500 in March, which is 2,900 more than the previous year.

Indiana's estimated labor force (the number of people 16 years of age and older who are able and available for work) totals 3,103,300 in March 2002. An estimated 2,939,200 Hoosiers are employed and 164,100 are unemployed.

Indiana's labor force for March 2001 totaled 3,078,000. Hoosiers employed one year ago is estimated at 2,947,600, and March 2001 unemployed in Indiana totaled 130,400. Indiana's estimated unemployment rate one year ago was 4.2 percent, compared with the national unemployment rate of 4.6 percent in March 2001.\*

\*Due to an expansion in the Current Population Survey (CPS), mandated by Congress, estimates for June 2001 (revised) and later at both the state and substate levels may not be fully comparable with those of earlier periods. In analyzing data, be aware that over-the-year comparisons, may differ slightly from comparisons that would have been made using data without the sample expansion. More detailed information can be found at <http://stats.bls.gov/launews1.htm>.
